Instructions

- Use this form to provide detailed information about the injured worker's ability to work. Add comments to Section 4 or attach additional information as necessary. BWC uses the information to support a request for temporary total compensation.
The treating physician must submit this form each time they see the injured worker unless they:
- Have been awarded permanent and total disability.
- Have returned to work without restrictions within seven days of the injury.
- Are being treated after the treating physician has released them to their former position of employment (i.e., full duty job) held on the date of injury without restrictions.
While you may use an equivalent physician-generated document (e.g., office notes, treatment plan) to the MEDCO-14, it must contain, at a minimum, the required data elements. If you've previously submitted equivalent data, indicate the date of the report on the form (e.g., 5/15/2021, office note).

Note: Physician assistants and nurse practitioners may complete this form; however, they may only certify temporary disability for the first six weeks after the date of injury. Subsequent periods of temporary disability require a co-signature by the treating physician.

- Fax form to the managed care organization if the employer is state-funded or to the employer if self-insured.
Important: Failure to provide complete information may delay compensation payments to the injured worker.

Form with sections: Injured worker name, Claim number, Date of injury, Date of last appointment/examination, Date of this appointment/examination, Date of next appointment/examination, Submission type, Job description and work status, Disability information, and a table for work-related allowed conditions.

 - Do cognitive, emotional, social, or behavioral barriers exist that may be interfering with expected healing? Yes No
- Vocational rehabilitation is a voluntary program for an eligible injured worker who needs assistance to remain at work or return to work. Is the injured worker currently able to participate in a vocational rehabilitation program? Yes No

Maximum medical improvement (MMI) status

Reporting changes from last evaluation No changes

MMI is a treatment plateau (static or well-stabilized) at which no fundamental functional or physiological change can be expected within reasonable medical probability, in spite of continuing medical or rehabilitative procedures. Has the work-related injury(s) or occupational disease reached MMI based on the definition above? Yes No

• If yes, give MMI date: ____/____/____. Note: An injured worker may need supportive treatment to maintain his or her level of function after reaching MMI. So, periodic medical treatment may still be requested and, if approved, provided.

Treating physician's signature – mandatory (See exceptions at the top of the form.)
